DO YOU INTEND TO BUILD?

If you do, be sure that your painting is done well. An harmonious combination of colors is very essential to the good appearance of a house, and care should be taken to secure it. A good paint only should be used, because poor paint will soon look old and shabby. The use of a good paint will prove a safeguard against the troubles often experienced in using paint, and will be much more economical in the end. Send us a photograph or drawing of your house, or refer to the number of design selected from this book, and we will arrange an artistic combination of colors free of charge to those who use The Sherwin-Williams Paint.
