Subject: RE: BHRC-TC FYI... FR Notice: Proposed NCI Benzene Case-Control Study in China.

Suggest that we put it on the agenda for OC meeting in SF. As a consortium we can have a discussion, then put it on the agenda for our meeting with Irons in Asilomar.

Regards,
Patsy

Subject: BHRC-TC FYI... FR Notice: Proposed NCI Benzene Case-Control Study in China.

BHRC Technical Committee (TC) -

FYI, from Patrick Beatty....

On July 21st, NIH published a Federal Register notice (attached) soliciting public comment on a proposed NCI data collection project titled "Case-Cohort Study of Cancer and Related Disorders Among Benzene-Exposed Workers in China". Dr. Richard Hayes (NCI) is listed as project officer, and contact for a copy of the data collection plans or more information.

Patrick suggests that this might be a discussion topic for Committee break-out meetings at Asilomar. Also, while the Consortium may not wish to comment on this proposal, he suggested that we consider requesting additional information through one or more channels.

Best Regards - Bruce.

>

I got this from our government affairs office which was aware that CVX was a member of the BHRC. They thought there might be a link.

I was under the impression that this study was already well underway. We should contact Richard Hayes to see what kind of response we get.

Patrick
