O'BRIEN RUBBERIZED TRAFFIC PAINT

O'Brien Rubberized Traffic Paint is a fast-dry, rubberized marking paint for concrete, brick, and bituminous surfaces. Formulated with chlorinated rubber. Excellent coverage, hiding, and durability in all climates. Open to traffic 30 minutes after application. Available in both white and yellow.

DIRECTIONS

Preparation — Surface must be clean and dry.

Application — Machine spray is recommended. May be applied also by brush. Not recommended for application in temperatures lower than 40° F.

Thinning — Over asphalt surfaces, apply at package consistency both for maximum durability and for best resistance to "bleeding." Over concrete and brick surfaces in hot weather, reduce 10% with Rubberized Traffic Paint Thinner for brush application.

Drying — Dries in 3-5 minutes on concrete and asphalt; 5-7 minutes on brick. The addition of Rubberized Traffic Paint Thinner will slightly retard drying.

Use of Beads — Beads must be dropped immediately upon application since paint dries rapidly.

CAUTION: Rubberized Traffic Paint will lift other types of fresh paint. It will not affect paint that has been on the surface for three months. — (EWY)

CAUTION!

CONTAINS LEAD. HARMFUL IF SWALLOWED. Keep away from heat, sparks and open flame. Do not apply on window sills, toys, furniture or interior surfaces of rooms which may be used by children. Avoid prolonged contact with skin and breathing of vapor or spray mist. Close container after each use. Use with adequate ventilation. KEEP OUT OF THE REACH OF CHILDREN. 15
