JOPLIN PLANT

Re: Gypsum in One-Cote Cement Formulation

We have been advised by Mr. J. H. Withers of the Bestwall Certain-Teed Sales Corporation that the price of gypsum molding plaster will be increased $1.00/ton as of March 1, 1958. It is my understanding that all manufacturers of molding plaster will also raise their prices as of this time.

All orders for gypsum molding plaster for shipment before March 1 will be made at the old price of $27.92/ton, delivered to Joplin for 40,000 lb. carloads.
