January 2, 1942

Chicago Local Board No. 37
3959 West Ogden Avenue
Chicago
Illinois

RE: Bartley Peter Saunders

Gentlemen:

You have up for reconsideration the above registrant who is an employe in our Asbestos Millboard Manufacturing Division, and we wish to inform you, and at the same time ask your guidance inasmuch as while the work this man is doing requires only a limited amount of skill, the nature of the job is such, however, as to make it difficult for us to find a replacement. It requires the strength of a younger man and is not too desirable work for the reason that the operator is required to wear a mask for the handling of the fine asbestos fibers.

The product, namely asbestos millboard, is one which we sell in quantity directly to the Army and Navy for insulation and ammunition storage (igloos), and also, it is the basic commodity of our gaskets, which gaskets we are furnishing to the manufacturers of tanks, submarines, airplanes, trucks, tractors, etc., etc; and in this connection, this company is rated 95% defense under the PD-25 regulations.

The above are forthright facts, and if, in your opinion, they are of any consequence in your consideration of this case, we would gladly fill out the necessary 42-A Form or the like.

Yours very truly,

VICTOR MANUFACTURING & GASKET CO.

Manager, Industrial Sales
