PLAINTIFF'S EXHIBIT

CAP-1053

CEMENT ASBESTOS PRODUCTS COMPANY

Birmingham, Alabama

January 13, 1977

TO: Jim Carpenter/S. D. Weaver, B. Klomfas

FROM: A. E. Alpine

SUBJECT: PIPE STATISTICS

While 1976 figures haven't been published it is interesting to compare percentages and trends in the industry. A comparison of pipe diameters indicates:

Size	Pipe In Ground Prior to 1975	Installed 1975	Installed 1976
Under 6"	18%	9.7%	
6" - 12"	72.7%	72.5%	
14" - 24"	7.2%	11.7%	
27" - up	2.1%	6.1%	

While PVC is making great inroads on 6" Asbestos-Cement pipe (4" has been written off) the situation is as listed below.

4" - 16" is 91.6% of the footage, but 55.8% of the dollars
18" - 36" is 6.6% of the footage, but 29.5% of the dollars

Large diameter pipe requirements are growing slowly but until the 1976 figures are known it is estimated that Capco has the capability to produce sizes to cover 93 to 94% of the market.

A. E. Alpine

Note: These figures are copied from an ACPPA workshop meeting in 1976.

1-13

Circulate: W. R. Bond, W. H. Beasley, I. L. Taylor, W. R. Perrell
