D.E. Roush - B2S H
P.L. Slayton - 1650

Attached is a copy of the Therminol FR Approval List. This list contains the names of virtually all purchasers of Therminol FR fluids over the last three to four years plus selected customers where it was definitely known that a system existed.

Based on the feedback supplied by the field sales people we categorized the systems as shown. Those systems which could not be located or where the application needed additional clarification were either left "open" or put on the "not approved" status so that any new order would be directed to the Product Group for contact.

Please note that all orders for five or more drums of FR fluid be directed to the product group for review even though the customer is on the approved list. Also direct any orders for FR fluids from open or non approved customers to the product group so that they can be converted to a non FR fluid.

To eliminate the possibility of repeated small orders by a customer we request that the COP representative verify the last order by a potential user. If the last order was entered within the last 3 months. the order should be directed to the product group for review.

The product group will also maintain a monthly up date of this list. Should anyone receive information about the status of any customer please notify us and the customer will be reclassified after review.

We would also request that the regional managers either review this list or provide a copy of this list for their field sales people to insure the accuracy of account status. Should there be any question about this please let me know.

James J. Roder
