44. State whether defendant is aware that there is a possibility of exposure to asbestos from asbestos particles, dust, and fibres being emitted from automobile asbestos parts, which are manufactured, sold, or distributed by defendant, to:

Improper question inasmuch as it is overbroad. There is very little ***

a. workers actually handling the asbestos products and/or parts containing the asbestos, and state the dates the defendant was first so aware, and the name and address of the person who gained such awareness on defendant's behalf;

b. mechanics installing, repairing, or maintaining the asbestos product, and state the date the defendant was first so aware, and the name and address of the person who became so aware on defendant's behalf;

c. other workers or mechanics in the area where the asbestos products are used, installed, repaired or maintained, and state the dates defendant was first so aware, and the name and address of the person who gained such awareness on defendant's behalf;

d. members of the families of auto workers or auto mechanics or others foreseeably in the area where asbestos parts are worked on, such as salespersons or office workers who come into the area or who are exposed to airborne asbestos, and state the date defendant was first so aware, and the name and address of the person who gained such knowledge on defendant's behalf;

e. members of the general public, and state the dates defendant was first so aware, and the name and address of the person who gained such knowledge on defendant's behalf.

*** possibility of exposure to asbestos fiber from disc brake pads manufactured by Thiokel as referred to in parts a thru e below.

PRODUCED BY FORD
