SUBJECT : Westinghouse research work with Tolyl Xylyl Sulfone and Aroclor 1242 mixture

REFERENCE : Attached work by Westinghouse and Crocker, Burbank

TO : P. G. Benignus

Paul,

If you recall on our last visit together at E U C, I was talking with Dr. Moore about impregnating conditions. The attached work was what she gave me as a reference. In light of most recent R & D work this is quite interesting. Are we familiar with the referenced patent work?

Dr. Munch probably is way ahead of this but thought the information may be useful.

Best regards,

Jim Bryant
