James Collins, Ph.D.
Director of Epidemiology
Monsanto Corporation

Dear Dr. Collins:

I am writing to inform you that we are nearing completion of our pentachlorophenol paper and will forward it for review by July 1. In the paper we intend to have a table which presents existing data on levels of PCDDS, PCDFS, and other contaminants (e.g. hexachlorobenzene) in the technical pentachlorphenol produced at the Krummrich plant. Any information you have concerning levels of contaminants in the product would be helpful.

Sincerely,

Daniel Hryhorczuk, M.D.
