SHORTAGE OF HAY SUPPLY FORESEEN

WASHINGTON May 19 (AP)— The agriculture department has discovered a shortage of hay—in contrast to the surpluses of cotton, wheat, corn and hogs, mice, rice, tobacco, peanuts, flax and other products.

Supplies of market hay are being reduced rapidly, with prospects of complete disappearance in many areas, and the smallest carryover in years, the department reports largely as a result of drought.

With total production of 67,457,000 tons of tame hay last year and 9,122,000 tons of wild hay the crop was 8.7 percent less than a year and 9.2 percent less than the 1926-35 average. Hay fed or farm use a year usually totals about 80,000,000 tons.

Miss Emily Marshall, junior at the University of Missouri, turned a perfect score in each of 30 matches as a member of the girls' rifle team.

Peat Moss

(Air-weighed)

Will transform the hardest and poorest soil into the finest loam. Peat Moss will save its cost in water and the time you will save in watering lawns and shrubs.

Mix Peat Moss with your most stubborn soil and you can grow the finest lawn, flowers and plants.

Work Peat Moss into your garden and lawns. Peat Moss holds the moisture that is so essential to plant life. Peat Moss helps to loosen up the ground into which it is mixed, yet it is so retentive that it stores away moisture and gradually releases it to the roots where the roots can get at them and get all the moisture and plant food available.

We are direct importers of Peat Moss and can offer you Peat Moss at the lowest possible prices.
