Monsanto Company Ltd.,
800 North Lindberg Blvd.,
"A" Building,
St. Louis, Missouri,
U.S.A.

ATTENTION: Dr. Kelly

Dear Dr. Kelly;

Further to our telephone conversation of November 26, 1969, I would like to confirm that Mr. D. Clegg, the toxicologist, and myself, expect to be in St. Louis on the morning of December 8, 1969 and would propose to be at your office at approximately 9:00 a.m. Should there be a change of plan, we will advise you by telex.

This opportunity to meet with you and to discuss some of the problems and questions which confront us regarding the use and presence of the chloronated biphenyl compounds is greatly appreciated. We would hope that by personal contact we would be able to obtain a better understanding of whether or not problems are likely to occur because of the presence of this material in our environment.

Yours sincerely,

A.B. Swackhamer,
Chief, Division of Pesticides,
Packaging and Incidental Additives.
