St. Louis, Missouri

December 11, 1958

Mr. H. S. Litzsinger

General Office

OS-95 TOXICITY DATA

Attached is the type of information that I think should be included in the section on toxicology in any forthcoming bulletin. It should be remembered that the interpretation of the toxicity of OS-95 goes beyond that which would be obtained by the acute data listed. It is, of course, based on our long-term studies with the basic chemical makeup of OS-95.

R. Emmet Kelly, M.D.
