Mr. Stuart Rice
Building E
Technical Center
Caterpillar Tractor Co.
Mossville, Illinois

Dear Mr. Rice:

We are shipping to your attention a drum of MCS-561 for your investigation. We will be very interested in your conclusions after working with the product.

Mr. L. R. Stark will contact you to arrange a visit to discuss materials compatibility of our fluid and the systems. If possible, I believe he should also visit Mr. Sansom for the same purpose.

Your comments on our work were appreciated. We hope your investigation will show commercial merit for the technology.

Yours truly,

D. J. Massey
Project Manager
Development Department
