PERSONNEL CONTACTED: J. Blanchet, Project Engr.
Dean McKinnon, P.A.
Chuck ~~XX~~ Hotes, Scheduling

OBJECTIVE: Determine 15,000 gallon hydraulic fluid requirement status.

RESULTS

Engineering at Western Gear released job no. 297-31374 on November, 1971 for procurement of 15,000 gallons of phosphate ester hydraulic fluid. As of 12/16/71, request for quotation had not been mailed out to potential vendors. Blanchet feels that the fluid selected must have a diesel ignition factor of 40 to 42. Neither he nor I could fully understand why it was difficult ~~xx~~ to obtain diesel ignition factors on Pydraul 312-A, or for that matter on any fluid.

Western Gear plans to filter the fluid at Everett and at Chester to their required cleanliness levels. Their A&S 6 or 7 Aerospace cleanliness levels are their own requirements.

ACTION REQUIRED

JAK - Obtain request for quotation end of December or early January.
