Re: Paoli PCB Railyard Litigation

Dear Paul:

As I indicated to you during the deposition on August 3, 1988, there were a few other documents which you said National Medical Service would make available to us.

First we would appreciate, if available, National Medical Services' documentation on how it reconstitutes, dilutes and stabilizes the National Bureau of Standards sample for quality control purposes.

Secondly, you stated that you were aware that the certifying bodies for National Medical Service may have some specific requirements for establishing and monitoring laboratory accuracy and precision. We would appreciate copies of any of the certifying bodies specific requirements. In particular, if such information is available, we would appreciate documentation on the certifying bodies requirements which are applicable to PCB analyses for either serum or fat. Again, if such documentation is available, please enclose documents which indicate how National Medical Service documents its compliance with these requirements.

We would appreciate a timely response. If you have any questions or comments, please do not hesitate to call us at the above number.

Thank you again for your cooperation.

Very truly yours,

WHITE AND WILLIAMS
