APPENDICES

Appendix A. Common Units Used in Measuring Airborne Asbestos Concentrations A-1

Appendix B. Addresses of EPA Regional Asbestos Coordinators B-1

Appendix C. Asbestos-Containing Materials Found in Buildings C-1

Appendix D. Definition and Description of Factors for Assessing the Need for Corrective Action D-1

Appendix E. Example Building Inspection Form E-1

Appendix F. Recommended Specifications and Operating Procedures for the Use of Negative Pressure Systems for Asbestos Abatement F-1

Appendix G. Estimation of Fiber Detection Limit Using the NIOSH Membrane Filter Method (P&CAM 239) G-1

Appendix H. Glossary H-1

LIST OF TABLES

Table 1. Organization of Factors for Assessing Fiber Release Potential 3-8

Table 2. Comparison of Asbestos Control Alternatives 3-27

Table 3. Total Airborne Fiber Detection Limits and Associated Sampling Volumes ... 4-2

Table C-1. Various Types of Friable and Nonfriable Materials and Products C-2

LIST OF FIGURES

Figure 1. Comparison of Measured Airborne Asbestos Concentrations in Three Settings 1-5

Figure 2. Control Program Organization 2-2

Figure 3. Examples of Friable and Nonfriable Asbestos-Containing Materials Found in Buildings 2-3

Figure 4. Steps in Investigating for the Presence of Asbestos 3-3

Figure 5. Types of Building Materials Which Could Contain Asbestos 3-4
