On the Phil Donahue Show (originates Dayton, Ohio) on July 4, 1973, (Channel 8 out of Cleveland, Ohio), Mrs. Millie Shriver, a vegetarian from the American Vegetarians Inc., cited Monsanto by name and that PCBs are sterilizing us. She cited the case of mink being sterilized because they were fed fish from Lake Michigan.

I thought you should know of this in case you receive any inquiries. She was attempting to prove the point that you should be a vegetarian, but I felt her comment was indiscriminate.
