Mr. Elmer P. Wheeler
Monsanto Company
800 N. Lindberg Boulevard
St. Louis, Missouri 63166

Dear Elmer:

I have finally managed to discuss publication of the Aroclor papers in Toxicology and Applied Pharmacology with Earl Dearborn who is the editor. Earl said that there would be no problem of publishing a number of papers in one single issue. This has been done previously as we mentioned to you. Lilly used one whole issue to describe studies with one of their compounds, and Dow Corning has about seven papers which will probably appear in the January 1972 issue of TAP.

The basic requirement is that we have all papers submitted at the same time. Earl would like to have two or three week's advance notice when the papers are almost finished. He will send the papers to one reviewer so that there will be consistent editing and comments which will apply to all of the papers. We have to give him the order in which we want the papers printed and he will arrange them properly.

While it is possible to have these papers published without any charges, it would be very desirable to the Society of Toxicology to have a donation from Monsanto. In the case of Lilly and Dow Corning, contributions to the Society have been made. The Society guarantees Academic Press so many pages for each volume of the journal. They have such a waiting list that additional pages would have to be purchased for a publication such as ours. It costs the Society $40 per page, and a contribution equivalent to $40 per page would be looked upon very favorably by the Society. If we assume 30 or 40 printed pages, which is considerable information, the cost would be less than $2,000.

Best regards.

Sincerely yours,

M. L. Keplinger, Ph.D.
Manager, Toxicology
