The Cost of Rotting Buildings now running into millions

A ROTTING building is also a waste, because a small investment in paint will save it. A building that is not protected by paint must either be rebuilt or repaired in a few years at a heavy figure.

Check the costs. Compare the prices of paint and lumber. Can you afford to bear the expense of rebuilding or repairing your home, when to save it costs so little?

When you paint, make an additional saving by using the best paint. It spreads easily—saves labor cost. It covers more surface per gallon than "cheap" paint.

But more important, the best paint serves five or more years longer than "cheap" paint.

The best paints are scientific in formula and preparation. We've been making them for 73 years.

The best material—PIONEER WHITE LEAD, pure linseed oil, pure zinc, and pure colors—are combined in Fuller's Paints in scientifically exact proportions with long time skill.

Free Advice on Painting

Ask our agent for advice, select shade, etc.
 Ask the Fuller Specification Department about the most desirable color schemes, color harmony and any other details.
 Take advantage of Fuller House Paints. Paint now. Don't let weather deteriorate your home more.
