Dear Bob:

Thank you for your report on the potential hazard associated with the introduction of tetramethyllead which I was very glad to receive since it terminates a job well done on the West Coast and in your laboratory. I believe this report played an important role in having the Surgeon General acquiesce to the use of TML and its derivatives at concentrations equivalent to 4 cc's of TEL on a metallic lead basis.

Regarding additional copies, I would be very happy to have you send one each to Dr. Rankin, Dr. Gerlach and Don Fowler of the Lead Industries Association.

Sincerely,

Jack
