Q. When did Monsanto stop putting Aroclor in its Pydraul products?

A. We reformulated our Pydraul products away from Aroclor (PCBs)in the early 1970s.

Q. Does Monsanto maintain a list of the customers to whom it sold PCB products; specifically, can you confirm that you sold it to the Chevrolet Foundry in Messina, NY?

A. I'm sorry, but we can't release the names of past or present customers for competitive reasons.

Q. When did Monsanto stop manufacturing PCBs?

A. We stopped manufacturing PCB products for open system applications about 1970, and stopped manufacturing PCB products completely in 1977.

SOURCE OF ANSWER David Wood
