Houston, TX 77224

Gentlemen:

I am very interested in being considered for a position in your Environmental Department. I have attached a resume for your review.

For the last ten years I have been extensively involved in the water treatment systems and waste treatment systems of refineries and petrochemical complexes. I have acted as a consultant, as well as a hands on supervisor, in waste treatment areas to insure compliance with EPA and DEQ guidelines. Impact of lower outfall and drift limits was another area where I consulted plant supervisors. The pressure of meeting absolute limits on metals, phenols, suspended solids, oxidants, etc., has rested on my shoulders.

I am well versed in the mechanical, chemical and operational aspects of most systems. My experience on belt presses, clarifiers, IAF & DAF units, drum presses, plate & frame presses, phenol destruct units, metal recovery, reverse osmosis units, microbiological digestion systems, oil separation/emulsion breaking, etc., has prepared me well for an environmental position. I worked well with the operators and supervisors. I also wrote operational manuals and trained these personnel in the optimal operation of their plant's equipment. I have made recommendations and/or changes to the waste treatment unit's mechanical and/or operational functions so that routine compliance with set guidelines could be accomplished.

I am eager to meet with you personally to discuss the association of myself and your company. My schedule is flexible and can be made to fit your schedule. If you need clarification or additional information, please contact me at (318) 433-2107.

Sincerely,

Dennis A. Yancey

CONFIDENTIAL RESUME' OF

DENNIS ALLEN YANCEY

EXPERIENCE

August 1984 to June 1988: Employed by Calgon Water Management Division, a subsidiary of Merck, as a Technical Sales and Service Representative. Handle all facets of industrial water systems and waste treatment systems. Performed field tests, investigated sources of contamination, collected samples for lab testing, interpreted analytical findings and made recommendations and changes based on analyses. Trained operators and educated supervisory personnel in optimal utilization of latest water treatment technologies and equipment.

February 1979 to August 1984: Employed by Olin Water Services as a Technical Sales and Service Representative. Performed field tests, investigated sources of contamination, collected samples for lab testing, interpreted analytical findings and made recommendations and changes based on analyses. Trained operators and educated supervisory personnel in optimal utilization of latest water treatment technologies and equipment.

February 1978 to February 1979: Employed by Olin Corporation in Quality Assurance Laboratory as a Chemical Analyst. Performed wet tests, atomic absorption, gas chromatography, spectrophotometric analyses, etc.

December 1977 to February 1978: Employed by Southern Pacific Railroad as a switchman.

January 1975 to December 1977: United States Army Officer. Responsibilities consisted of: Personnel Manager (counseling, advising, evaluation of state of training, placement of personnel); Personnel Supervisor; Pay Officer; Top Secret Control Officer; and Communications Security Control Officer. Top Secret Clearance. Upon leaving active duty, I was recommended for the Meritorious Service Medal. I received the 32nd ADCOM Letter of Achievement. Currently Captain in U.S. Army Reserves/Inactive.

June 1968 to December 1974: Employed by United States Postal Service and construction firm while attending high school and college.
