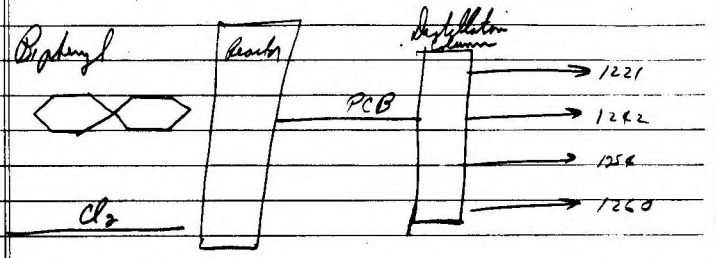
- Govt. appendix

5/23/72

Meeting w/ Freeman & Betta Carr



Silage forms acetic acid as it sits

- Aroclor provided Cumar w/ flexibility, resistance to acid, resistance to water

- Neville Chemical in Pa for a long time used the Cumar to [illegible] cumarone-indene resins -- not as chlorinated biphenyl.

- [illegible] who headed up Concrete Silo Company also [illegible] the name Cumar for his coating compound in [illegible]

- Wheeler - Anniston had some chloracne cases in late 1930's.

- Tests -- oral lethal dosage
  -- rabbit skin contact
  -- eye irritation potential

* - USDA had approved use of Aroclor in paints for meat packing houses that are federally inspected ≈ 1964 or 1965

* - Check whether we have sent other samples to Federal Govt.

* Dale Smith -- check WBP files
