(Jul 24, 1973

Dear Gentlemen:

I am writing to you in hope you may be able to help my doctor and myself. In May of 1972 I inhaled fumes from Inerteen 70-30 which had been exposed to a high voltage arc in an underground vault which hospitalized me for one week and me off work for eleven weeks. Since my release from the hospital I have had continuous headache which I am able to control with medication. My doctor and

myself would like to know if in your studies and manufacture of this oil you have any information that might help to rid me of these headaches.

I was also in the hospital in July of 1972 for one week for test of brain, spinal, blood and x-rays which all showed negative.

Any help you might be able to give to my doctor or myself would greatly be appreciated. Thank you.

Yours truly,
Donald R. Reed Sr.
