Ray Shapiro, FDA, called to inquire about the status of our analytical studies of samples of Aroclor 1248, presumably used by Dr. Allen, University of Wisconsin, in his studies with primates.

Ray is aware of our attempts to identify the material which created responses not normally found in Aroclor 1248 and is very anxious to get a status report from Monsanto.

I suggest someone review this matter with Dr. Shapiro. His address and phone number are as follows:
