

NEG. NO. AB-19A

## TRADEMARK FILE INFORMATION

Trademark: Ventfab  
Trademark Owner: Ventfabrics, Inc.  
Last Assignee: None  
Date of First Use in Commerce: October, 1946  
Registration No.: 1,057,103  
Date Trademark Registered: January 25, 1977  
Size of Label in Trademark File: N/A

Receipt of Pictured Label by Patent Office: N/A

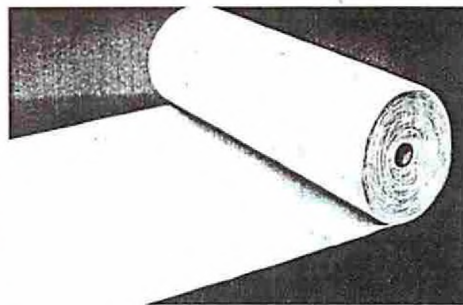

## Grade AAA Wire-Inserted Asbestos Cloth 36" and 40" Wide

This fabric, which is made of 95% pure asbestos, with fine brass wires inserted to give it strength, can withstand constant heat of 750° F. We do not have available any fabric other than this material which can withstand such temperatures. Because of its heat-resistance it can be extremely useful for fabrication of flexible connections exposed to high temperatures.

**RECOMMENDED USES** This fabric can be used on flexible connections exposed to high temperatures. It is particularly useful in making connections for induced draft fans. For such installations it is recommended that the flexible connection be made with an inner layer of Grade AAA wire-inserted cloth, and an outer layer of VENTGLAS Neoprene-coated glass fabric. The asbestos fabric will furnish the required heat insulation for the VENTGLAS which in turn will prevent excessive air leakage.

**APPROVALS** Conforms with federal specifications MIL-C-10316 B. Conforms with ASTM Specifications D1571-73T. Conforms with National Fire Protection Association Pamphlet 90A (1968), Paragraph 304, outlining standards for vibration isolation connectors in duct systems.

**SPECIFICATIONS** Weight: Approx. 44 oz. per sq. yd. Thickness: Approximately 1/16" thick. Tensile Strength: Approximately 125 lbs. per inch in the warp, 75 lbs. per inch in the filling. Grade: This fabric has an asbestos content of at least 95% and a synthetic fibre content of less than 5%. Asbestos fabrics made with such a high asbestos content are classified as Grade AAA. Fire-Resistance: Asbestos fibres non-combustible, synthetic fibres char. Heat-Resistance: Will withstand constant temperatures of 750°

F. Waterproof Qualities: This loosely woven fabric is neither waterproof nor air-tight.
