REQUEST TO MONSANTO COMPANY
FOR SAMPLE QUANTITY OF PRODUCT
CONTAINING POLYCHLORINATED BIPHENYL ("PCB")

1. Name and address of organization making request:
Microbiology Laboratory
Gerber Products Company
445 State Street
Fremont, Michigan 49412

2. PCB product requested: Aroclor 1254

3. Quantity requested: 2 oz.

4. Reason for request: Aroclor 1254 has proved more effective for enzyme induction than any compound tested by Ames.

5. Use to which sample of PCB-containing product will be put:
Induction of rat liver mixed oxidases in Ames mutagenicity test.

6. Disposition to be made of any unused portion of sample:
Discarded in same manner as radioactive wastes.

MONS 096179

7. Names and brief description of educational background and job responsibility of person(s) who will be working with sample:

Paul J. Thompson, Ph.D., Microbiology and Biochemistry - Manager of Research Microbiology Laboratory

Mary Griffith, B.S., Microbiology and Chemistry - Technician, Microbiology Laboratory

The undersigned organization represents that: the foregoing statements are true; it understands that if Monsanto elects to supply the requested sample of a PCB-containing product, Monsanto does so in reliance on the truth and accuracy of the foregoing statements; the person(s) designated by the undersigned organization who will be working with the sample is (are) aware that PCBs have been identified as a potential hazard to the environment and that regulations concerning their use or disposition are contemplated or may exist; that the label accompanying any sample will be read and cautions and instructions thereon will be observed; and that care is required in the disposition of PCB-containing products so as to avoid any adverse effect on human health and the environment.
