ducts could be placed proximal to the balance while weighing.

The last modification would consist of cleaning the work bench used in the cutting and filing operation with a vacuum cleaner rather than blowing it clean with an air hose.

I read just about the entire document.

MR. WILLIAMS: That is fine.

MR. SMITH: I am sorry, was that Ford Exhibit Number 1 admitted into evidence?

MR. IGNATOWSKI: Yes.

THE COURT: It will be admitted into evidence.

MR. SMITH: Thank you, Your Honor.

(Whereupon, Plaintiffs' Exhibit Number Ford 1 was received into evidence.)

MR. IGNATOWSKI: The next is our Ford Exhibit Number 95 dated March 31, 1970, again, intracompany correspondence to Mr. Willeke, safety engineer, dust exposure, Sheldon Road plant.

As requested, air samples were conducted at
