Response Time/Inventory Position

Products	
Aroclor 1016 1242 1254 Inerteen 70/30 54201 CM	1. Tank car quantities on hand at all times on 1016, 1242, 1254, and 70/30; 90% of time on 54201 CM. 2. Assuming a suitable, empty T/C is available, it can be loaded the day after an order is received. On occasion a T/C may be pre-loaded, but this cannot be guaranteed. 3. Effect of manpower reduction - if an order is received on Friday on one of these products it would ship Monday instead of Saturday(again assuming T/C available). O.T. could be used on Saturday if justified. 4. Adequate supply of drums on hand 95% of time. If inadequate, one working day needed for 55 gal.,longer on 30 gal. and 5 gal. containers.
Aroclor 1221 1232 1248	1. Bulk quantities not maintained and not required. No storage tanks available. 2. Small stock of drums maintained. If more drums wanted than on hand, 6 working days required. With reduced manpower, the week-end would not be working days unless O.T. were used.
Pyranol A13B3B2 (1254 plus TTCB)	1. No bulk maintained; small drum stock. For bulk, 5 working days required, for more drums, 6 working days needed.
Pyranol A13B3B Inerteen PPO	1. No more will be produced; small drum stock currently available.
