Keith O. Preston , Plant Manager
Owens Corning Fiberglas
1111 W. Perry St.
Bloomington, Illinois

Subject: Plant Inspection 14 November 1974

1. Jennings Machine Area:

   A) A roof drain pipe has a sizeable leak causing a large amount of water on the floor in this area. The drain appears to be obstructed.

   B) Exhaust fan noise at end of Jennings machine! Again remind all in this area toplace cotton and or ear plugs in their ears.

2. Boiler Room:

   Overhead steam pipe leaking causing floor to be covered with water. Water also around electric machinery in this area.

3. Oh joy !!! Oh Joy!! The last of the damn asbestos has been removed from the storage area.

4. The remaining plant is very clean, orderly, light and a pleasing place to work.

G.B. McNeely, M.D.
