PLAINTIFF'S EXHIBIT USM-216

June 22, 1965

Mr. H. A. Boisclair
Johns Manville Company
270 Madison Avenue
New York, New York

Dear Tony:

As mentioned to you during our telephone conversation, although we are using the new asbestos we hesitate to give carte blanche approval because of our concern with shortness of the fiber. This we readily see when removing the wet applied fibers from a ceiling area. The longer chrysotile asbestos is no longer visible. We therefore would appreciate whatever effort you can exert to insure a maximum of fiber retained on the 4 and 10 mesh sieves.

Sincerely yours,

UNITED STATES MINERAL PRODUCTS COMPANY
