Mr. John F. O'Rourke
Vice President - Sales
United States Mineral Products Company
Stanhope, New Jersey 07874

Dear Mr. O'Rourke:

On Thursday, June 16, I visited the Federal Building Project in Cleveland, Ohio--a joint venture of Huber, Hunt & Nichols, Inc., and The Frank Briscoe Co., Inc., at which time I took atmospheric samples of dust. My report on this visit and the results of the tests has been submitted to Mr. Alton Evans, Project Manager.

A copy of your letter of June 3 to Mr. Evans has been given to me. In addition to the information contained in this letter I would like to know the source and mineral name of the asbestos that you use. I would also be pleased to have the results of any tests you have made which disclose the toxicity of the particular asbestos.

I would also like to know if this asbestos had been treated in any way, such as calcined, to reduce its possible carcinoma producing parts.

Some questions were brought up at this meeting relative to a possible health hazard from the wetting agent or glue that you use to make the material adhere. Therefore, I will appreciate any information you can give me on this material.

Yours very truly,

DeWitt Huffman, P.E.
Assistant Chief
Engineering and Hygiene
