1st Draft 4-15-70

INFORMATION FOR MINISTRY OF
AGRICULTURE, FISHERIES AND FOOD, U. K.

"In response to the request to inform the Ministry of ~~major~~ uses of PCB's in the U.K., there is a paper coatings use of Monsanto's Aroclor 1242. Aroclor 1242 is used by Wiggins Teape, Ltd., at Treforest Factory, Pontypridd, South Wales, for one of their specialty coated products. Although it is Monsanto's understanding that the PCB's being identified in the environment are similar to our Aroclor 1254 and Aroclor 1260 products, it was deemed advisable to inform the Ministry of this ~~major~~ use of Aroclor 1242 also.

Wiggins Teape is a licensee of National Cash Register in regard to this product and usage of Aroclor 1242. National Cash Register can provide further information if required.

We would appreciate confidential treatment of this important trade information."
