OSHA ASBESTOS REGULATIONS

Ref: Letter, Hayden to OSHA Coordinators dated 8/2/73, same subject

Responses to the reference letter indicate a strong desire to have, as soon as possible, a Textile Fibers Department get-together to discuss implementation of the OSHA regulations and Standard S4T in respect to the use and handling of asbestos. We therefore propose that the meeting be held in Wilmington, Nemours Building, Room 5419, Tuesday, September 11. —— 8:30 Attached is a suggested list of topics to be discussed at such a meeting. Since you have indicated that your interest in this subject centers primarily around discussion of what other sites are doing or intend to do and since the questions you have raised require discussion with qualified personnel, we have arranged to have representatives from Engineering Standards, the Safety & Fire Division, Haskell Lab., Engineering Services Division and Construction present to participate in a "round table" discussion of the subjects. Also attached is a list of tentative participants.

361

DUP 0903248

J08900

DU 024629

Please review the attached tentative agenda and indicate the priority in which you feel these subjects should be covered. It appears as though the items listed will require a full day to cover, however, if there are additional OSHA items in which you are interested, please so indicate. If I could have your response to this letter by 9/4/73, I will issue a final agenda.
