TO: Mr. Henry Licht
Industrial Hygiene
Rouge

FROM: J. B. Sherba, Safety Engineer
Paint & Vinyl Operations
Industrial & Chemical Products Division
Mount Clemens, Michigan

Please be advised that the usage of asbestos in the Paint & Vinyl Operations is limited to insulating heat producing ovens and pipes.

Ovens are insulated with slab asbestos which is cut to appropriate sizes by our carpenters.

Pipes are insulated with standard pre-formed asbestos insulation by our pipefitters. The joints and elbows are covered by forming an asbestos dough of loose asbestos fibre wetted with water.

A total of seven (7) carpenters in the Vinyl Operations work with asbestos slabs. Approved respirators and vacuum system are used when cutting asbestos slabs.

Seventeen (17) pipefitters in the Vinyl Operations, and sixteen (16) pipefitters in the Paint Operations work occasionally with asbestos in insulating pipes or resin reactors.

J. B. Sherba, Safety Engineer
