Dr. R. Emmet Kelly
Monsanto Chemical Company
800 North Lindbergh Boulevard
Saint Louis 66, Missouri

Dear Dr. Kelly:

We are considering the use of your product Arochlor 1242 as a component in one of our formulations which will be used in a food packaging application subject to the approval of the Food and Drug Administration.

While we are aware that the complete formulation must be submitted for final approval, we would like to first establish if Arochlor 1242 is chemically included within the materials listed in the Federal Register under Subpart F, Section 121.2520. Should it be an approved material based on prior sanction or substances generally recognized as safe, we would like to be informed of this fact.

Whatever information you can supply us with on the status of Arochlor 1242 will be greatly appreciated.

Very truly yours,
Interchemical Corporation
