all roof deck requirements met here with

PYROFILL*

THE ORIGINAL GYPSUM ROOF DECK

Roof deck requirements for a school as modern as this one were many and varied—the versatility of PYROFILL made it the logical choice. It's fireproof, strong, lightweight; meets desired heat loss requirements. With the wide choice of formboards available, it can be adapted to almost any type of roof or building. And PYROFILL Gypsum Concrete is economical, quickly installed—a single crew often pours more than 20,000 feet in one day. PYROFILL poured-in-place roof deck can very well be the answer on your next project. Why not keep it in mind?
