R. H. Munch	Res. 2-JFQ

Your letter of November 20, 1969, outlining the need for a capacitor testing facility has caused some action. R. Munch and P. Benignus are gathering information from capacitor manufacturers and suppliers so that we can determine costs to set up a laboratory. We are not enthusiastic about winding our own capacitors yet, but we do want the rest of the steps.

I would imagine that Europe/U.K. would need test facilities to get the polypropylene business and stay competitive with Prodelec. Your detailed inputs on equipment desired and approximate costs for a European test laboratory would be in order. Please keep to program austere.

Thanks,

W. R. Richard
