THIRTY-SIXTH AND SPRUCE STREETS
PHILADELPHIA

February 16, 1943

Dr. Robert A. Kehoe,
The Kettering Laboratory of Applied Physiology,
University of Cincinnati,
Cincinnati, Ohio.

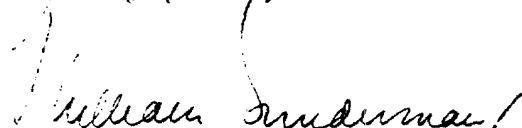

Dear Dr. Kehoe:

We are called upon occasionally (perhaps once every two or three months) to make analyses for lead in the blood and urine. Even if we were set up to make such analyses, because of their infrequent nature ~~of such analyses~~, I do not believe I would have much confidence in the reliability of the results.

I have wondered therefore whether you might be interested in having me refer such analyses to you. If so, would you care to write me the approximate cost, your preference as to type and manner of collections, and the analytical methods you now employ.

With the best of all
good wishes, I am,

Sincerely yours,

F. William Sunderman, M.D.

FWS/EK

P.S. I ~~was~~ very much interested in reading your paper on "Lead Absorption" in the current issue of the J.A.M.A.
