Subject: JOHNS-MANVILLE
MANVILLE, NEW JERSEY

Re: Coke oven asbestos caulking paper.

In discussing this project with R. V. Canfield last week, he suggested that 10 lbs. of 3Z fiber be sent to you for a laboratory trial.

In a follow up with Bill Hall today he advised that the 3Z fiber would be shipped shortly as they have been out temporarily.

In regard to a possible production run using 3Z fiber it was my understanding that we might also try to make the XX Johns-Manville paper as requested by Grant Wilson.

I am now wondering if we can ethically do this since Johns-Manville is to assist with the formulation and we have signed a secrecy agreement with them.

Perhaps you have something different in mind and there is no connection between the two products.
