KAISER CEMENT & GYPSUM CORPORATION

INTER-OFFICE MEMORANDUM

J. W. Post

DATE Nov. 22, 1971

COPIES TO

FROM E. Kulesza

SUBJECT ASBESTOS USED FOR GUN PLASTIC CEMENT.

The current asbestos being used in the Gun Plastic manufacture is Carey No. 7 MS-1 rather than the Johns Manville 7 MS-1 as indicated on the new production specification sheet. The manufacturer's name was an over-sight and should be corrected some time in the future. The current asbestos has been used since 1968.
