October 7, 1971

Dr. A. Barde Rogers
Assistant Director
Food Research Division
Armour and Company
801 West 22nd Street
Oak Brook, Illinois 60521

Dear Barde:

I enjoyed meeting and talking to you at the recent Washington meeting sponsored by the Scientific Advisory Committee of the National Broiler Council and I look forward to seeing you in Chicago at the Poultry and Egg Institute of America Research Council meeting.

As requested, I am sending you with this letter, a copy of our publication, "Monsanto Methodology for Aroclor" and under separate cover, a set of the Aroclor standards for use as reference materials.

I have also included a copy of an article by Dr. Berg which suggests a novel method of quantitating PCB residues by perchlorination to decachlorobiphenyl. We have not had a chance to evaluate this procedure in our laboratory but plan to soon.

Sincerely,

/s/ EST

E. S. Tucker
