A Helping Hand

Windsor Community Center, 4092 Robert Ave., received a helping hand for its extensive building repair program from the Monsanto Co. in the form of a $10,000 check. New glass for broken windows, a hot water heater, carpeting for the senior citizen room, weatherization and general repairs are on the "wish list" for the center, which opened Oct. 6, 1985, after sitting vacant and vandalized for more than five years. The check was presented on Friday to Gail Chatfield, left, state representative and current president of the center's board of directors, by Jerry Bishop, Monsanto's Carondelet plant manager.

Attention: Mr. Jerry Bishop

Dear Mr. Bishop:

Windsor Community Center is extremely grateful for your grant of $10,000. We have begun to work on the building, thanks to your help. The senior room is beginning to take shape with new windows to replace those covered with metal and plastic. We have bought carpet to cover the floor that was damaged by water. We have bought furniture and a T.V. and we hope to have this room ready for our Friday luncheon as a surprise for our seniors. We will then begin to replace the water heater that is leaking badly, and then to replace the broken windows in the gym. So much can be done thanks to your contribution. Please feel free to visit the center any time you are in the area.

Please join us for lunch at 11:30 on Friday May 9th to see the progress already made and to take part in the surprise for the seniors.

Sincerely,

Gail Chatfield
President Board of Directors
