Montars 2/3/4/6/7

Effective August 31, 1969, the following Montars will be discontinued:

Montar 2
Montar 3
Montar 4
Montar 6* (*None Available Now)
Montar 7

These are by-products of Aroclor distillation. Our aim is to maximize Aroclor yield. The volume available of these Montars is insufficient to justify our promotion of these products. If a customer did generate an application of any volume at all, we'd be sold out. This has happened with one or two of these Montars with resultant customer complaints. We have now been successful in converting these customers to other products.

Still available are:

Montar 1
Montar 5
Montar 9

Montars 1 and 5 should almost do anything the others can do. Montar 1 will give more flexibility than Montar 5 but the flexibility of Montar 5 could be improved by the addition of Aroclor 1242, 1248 or 1254.
