DR. WILLIAM BROCKBANK

2, St. John Street,
Manchester, 3.

June 30th, 1938.

The Secretary,
Messrs. Turner & Newall,
Spotland,
Rochdale.

Dear Sir,

I am wondering if you could possibly help me in the following matter:-

It is part of my duties at the Manchester Royal Infirmary to lecture to the students on lung diseases, and this of course includes asbestosis. Is it possible to obtain photographs of the dusty part of asbestos manufacture, and the methods taken to guard the employees against the inhalation of dust?

Obviously, of course, I don't want any photographs of secret processes. If it is possible for you to put me in touch with someone in the firm that would be likely to help me, I should be most grateful, and I would gladly come to Rochdale to talk things over, if it is likely to be helpful to my purpose.

Yours faithfully,

(Signed) William Brockbank.

M.A.,M.D.,M.R.C.P.

Hon. Assistant Physician,
Manchester Royal Infirmary.
