April 12, 1972

Mr. Donald R. Pogue
Monsanto Industrial Chemicals Company
800 N. Linbergh Boulevard
St. Louis, Missouri 63166

Dear Mr. Pogue:

Reference is made to your letter of April 5, 1972, concerning epoxy resins from both phenylamine and diethylene glycol. I cannot elaborate on the information which you found on page 185 at this time. We do not have a copy of the original article in which the information was published. Hopefully, we are anticipating the receipt of a copy sometime in the next few months. At that time we may be able to further define the information.

Thank you for your interest.

Sincerely yours,

Herbert E. Christensen, D.Sc.
