Alex

An IC Industries Company

Memorandum

Date: April 10, 1987

Subject: Experimental Order No. 15660

From: D. Swadley

To: H. Jamieson

Please reference my letter of February 17, 1987, the original request for this experimental order.

You shipped material to me on March 17, 1987, and indicated on the shipper that 4 sets each of 4515ED from 3 separate batches of 693-551C formula were shipped.

Checking the impression stamped number on the blocks I find that the blocks are actually from 6 separate batches of material. This will not do. I must have material processed as I requested in February.

To further explain the request:

Batch A - 4 sets 4515ED - 16 Cams, 16 Anchors

Batch B - 4 sets 4515ED - 16 Cams, 16 Anchors

Batch C - 4 sets 4515ED - 16 Cams, 16 Anchors

Please don't try any short cuts by pulling material out of stock if it doesn't meet the above criteria.

Request the assistance of Roger Rodriguez if you have any questions.

Since we have wasted our time and efforts to this point, I now need the material quickly. Shipment must be made to Winchester by April 24th so that it can be sent on for vehicle and dyno testing.

As before, I am attaching a copy of the experimental order and it's cover letter.

Thanks.

Dave
