Dear Lynn:

I enjoyed having the opportunity of discussing the status of the dairy cattle study with you. However, I want to take this opportunity to encourage you to take the necessary steps to fill the analytical chemist position as soon as possible with someone who has sufficient training and experience to be able to step in and proceed at a fast pace. With the delays that we have encountered, certainly a professional person having these attributes could be a significant step forward in meeting the projected study schedule.

Good luck in your search. If I can be of assistance, please let me know.

Sincerely,

John H. Craddock
Product and Environmental
Safety Director
