NEW YORK

INTER-OFFICE
CORRESPONDENCE

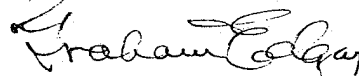

January 6, 1933

Dr. R. A. Kehoe,

My dear Kehoe:

I am sending you a copy of a letter which we received concerning the possible toxicity of Remo. This letter has been answered temporarily, but we are apt to get inquiries of this type; and I should like to have your idea as to the proper answer to make to a letter of this type.

Very truly yours,

Graham Edgar.

GENERAL MOTORS CORPORATION

January 3, 1933.

To Ethyl Gasoline Corporation

E. Milwaukee Ave. Detroit, Michigan

From Mr. J. E. Eshbaugh

AC Spark Plug Company, Flint, Michigan.

Attention: Mr. C. D. Hawley

Dear Sir:

We are frequently approached by prospective Remo Injector customers for authentic information concerning the possible poisonous and injurious effects of Remo.

A case at hand is a manufacturer of farm lighting plants who believes that the type of people who would be required to make service installations of the Injector are not particularly mechanically inclined and may get into trouble in handling the liquid if it is poisonous. They also wish to know if any harm is likely to result in spilling the liquid on hands, clothing or on an animal.

Will you kindly give us at your earliest convenience reliable information by means of which we may combat inquiries of this kind.

Yours very truly,

(sgd)

J. E. Eshbaugh
